AquaSmart Water System Information

This caravan is fitted with the Whale Aquasmart Water System incorporating the Smartflo Pressure Pump to provide you a reliable and high flow rate for superior showering. To achieve the best performance from your Smartflo Pump please follow the priming instructions below.

When the system is first used or if air is sucked into the system when emptying your water container:

- Open one hot tap (e.g. kitchen sink).
- Place carbon filter which is fitted to hose into the water container.
- Insert plug into wall socket and close lid to lock plug in place.
- Switch on 12V supply to pump.
- When water is flowing smoothly close hot tap and open cold tap to expel remaining air.

Note

Following these instructions will maximize the performance of your pump.
